

Website Redesign & Enhancement Notes

The current Retal Residence website feels dated and heavily dependent on a single full-screen image. The goal is to elevate the website to a premium, contemporary experience like the reference websites provided, with a stronger focus on storytelling, content presentation, visual hierarchy, and user engagement.

1. Overall Look & Feel

Current Issues

- Website appears outdated.
- Content is behind.
- Large dark overlays reduce the impact of imagery.
- Heavy left-side navigation consumes valuable screen space.
- Lacks the premium, editorial feel expected from a luxury residential brand.

Required Improvements

- Adopt a cleaner, more modern, architectural aesthetic.
- Create a spacious layout with generous white space.
- Use a refined grid system throughout the website.
- Introduce elegant transitions and subtle animations.
- Focus on a luxury lifestyle presentation rather than a static property showcase.

2. Homepage Redesign

Hero Section

Replace the current hero style with:

- Full-screen premium photography or video.
- Minimal text overlay.
- Strong typography and cleaner composition.
- Elegant call-to-action buttons.
- Remove icons

Typography

- Use larger headlines with more breathing room.
- Reduce text clutter.
- Create clear hierarchy:

Hero Title, Subtitle, Supporting Description

3. Navigation

Current Issues

- Vertical navigation occupies excessive screen space.
- Navigation feels outdated.

Proposed Solution

Use a horizontal navigation bar:

- Logo on left.
- Main navigation centered or right aligned.
- Language switcher integrated elegantly.
- Sticky navigation on scroll.

This approach is more consistent with modern luxury real estate websites.

4. Residents Section

Add photos of how the residents interact with different spaces:

- Schools
- Shopping
- Healthcare
- Community Activities

5. User Experience

Add

- Smooth scrolling effects.
- Parallax image transitions.
- Modern hover interactions.
- Visual section transitions.

Improve

- Mobile responsiveness.
- Faster page transitions.
- Better readability.

6. Luxury Brand Positioning

The website should communicate:

- Premium living.
- Sophisticated design.
- Community lifestyle.
- Trust and security.
- Architectural excellence.

In Conclusion

The redesign should incorporate:

- Clean layouts.
- Editorial-style content sections.
- Large imagery.
- Strong typography.
- Spacious white space.
- Modern navigation.
- Modular content blocks.
- Premium visual storytelling.

Target Outcome: A contemporary, elegant, high-end digital experience that reflects the quality and prestige of Retal Residence while improving usability, engagement, and overall brand perception.
